4. INSTALLATION
   Refer to appropriate NFPA Installation Standards.

5. OPERATION
   During fire conditions, the heat-sensitive liquid in the glass bulb expands,
   causing the bulb to shatter, releasing the pip cap and sealing spring
   assembly. Water flowing through the sprinkler orifice strikes the sprinkler
   deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
   Refer to NFPA 25 for Inspection, Testing and Maintenance require-
   ments.

7. AVAILABILITY
   The Viking Model VK606 Sprinkler is available through a network of
   domestic and international distributors. See The Viking Corporation
   web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
   For details of warranty, refer to Viking’s current list price schedule or
   contact Viking directly.
