**New Mobile Web Site for CPVC Piping Systems**

**Hastings, MI, USA** – Viking Group, a global leader in fire protection and life safety systems, has developed a new mobile web site to support its line of CPVC piping products. The new site provides a helpful field resource for installers, designers, inspectors, and others on the proper installation of CPVC piping systems. Included on Viking's new CPVC mobile web site is information such as cure time tables, application data, installation best practices, and material compatibility guidelines.

The site is designed to be accessed from any mobile device, such as a web-enabled smart phone or tablet computer. To launch the site, customers will first scan a special bar code. This QR code, which is included below, will appear on Viking's printed CPVC literature. Smart phone users can download any number of free apps for scanning these codes (such as ScanLife®, Tappinn®, I-Nigma®, etc.). After launching the app from their smart phone, the user is prompted to scan the code, often through the device's camera feature, and is then automatically directed to the mobile web site.

You can also access Viking's new CPVC mobile site on a desktop computer via the following link: <http://vikinggroup.mobi/p/33944>. Note that the content of Viking's new CPVC mobile web site is general in nature and does not constitute a complete installation guide. As always, installers should read, understand, and follow Viking's complete CPVC INSTALLATION AND DESIGN MANUAL, which can also be accessed from the new mobile site.

*Viking is a global leader in the manufacture and distribution of innovative fire protection and life safety systems. For over 90 years the company's products and services have protected lives and property worldwide from the devastating effects of fire. For more information on Viking's complete line of quality fire protection products and services, please visit [www.vikinggroupinc.com](http://www.vikinggroupinc.com) or call 800-968-9501.*
