

Trusted above all.™

Friday, April 3, 2026

Viking continues to navigate sustained cost pressures driven by raw material increases, higher production expenses, and broader market conditions. These factors have significantly impacted key components across our manufacturing processes.

We have worked to offset these increases through internal efficiencies and cost control measures. However, the magnitude and persistence of these pressures require a price adjustment.

Effective June 26, 2026, prices on Viking-manufactured products including Viking BlazeMaster® CPVC Pipe and Fittings will increase by approximately 6%. This adjustment applies to our full line of fire sprinklers, valves, systems, and related devices.

Orders must be accepted by close of business on June 19, 2026, to receive current pricing and remain subject to material availability.

We remain focused on delivering consistent quality and minimizing disruption to your business. This adjustment ensures we can continue to meet those expectations while maintaining a dependable partnership.

Updated pricing will be available on [www.supplynet.com](http://www.supplynet.com). Your local representative is available to assist with planning and any upcoming orders.

Thank you for your continued trust in Viking.

Sincerely,

The Viking Corporation
