Deluge Trim 241i

6” (DN150) MODEL F
DELUGE VALVE CONVENTIONAL
STAINLESS STEEL VERTICAL
TRIM CHART

Order Deluge Valve Separately

Figure 1

This Trim Chart is for use with the following Viking Trim Sets

<table>
<thead>
<tr>
<th>Valve Size</th>
<th>Stainless Steel Trim Part No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>6” (DN150)</td>
<td>14656</td>
</tr>
</tbody>
</table>

Notes: For use with Trim Charts on Page 241j

General Notes:

- Valve must be trimmed as shown. Any deviation from trim size or arrangement may affect the proper operation of the valve.
- Dimensions in parentheses are millimeter and may be approximations.

Note 1: Release System connection. Viking Deluge and Flow Control Valves are compatible with hydraulic, pneumatic, and electric release systems. A Pneumatic Actuator is required on all Viking Deluge Valves and Flow Control Valves equipped with Pneumatic Release Systems.

Note 2: Alarm Connections: Connect alarm line piping to 3/4” (20 mm) NPT outlet. When using a Water Motor Alarm, a strainer is required. 1/2” (15 mm) NPT outlet is for electric Alarm Pressure Switch.

Note 3: Optional non-interruptible connection for Alarm Pressure Switch to activate electric alarm panel. Note: After the Deluge Valve trips, this location cannot be shut off. Alarms may operate until the outlet chamber of the deluge valve is de-pressurized below the set point of the Alarm Pressure Switch.

Note 4: Viking Drain Check Valve is manufactured with a 0.067” (1.7 mm) orifice to allow alarm line to drain. DO NOT substitute. Check label for proper orientation.

Note 5: Inlet side of PORV is connected to the top chamber of the deluge valve. Inlet of PORV should be facing up. Outlet goes to open drain.
Refer to page 241i for General Notes and Notes 1 through 5.
