Form No. F_040904 Revised page replaces page 514e-g dated June 13, 2005. (Reformatted, updated pipe material requirements in General Notes)

2-1/2” & 3” (DN65 & DN80)
MODEL J FLOW CONTROL VALVE
HORIZONTAL CONV. TRIM CHART
Maximum 250 PSI Water Working Pressure

This Trim Chart is for use with the following Viking Trim Sets

<table>
<thead>
<tr>
<th>Valve Size</th>
<th>Galvanized Trim Part No.</th>
<th>Brass Trim Part No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2-1/2” (DN65) &amp; 3” (DN80)</td>
<td>12307-1</td>
<td>12307-2</td>
</tr>
</tbody>
</table>

Notes: For use with Trim Chart on Page 514f

General Notes:
- Valve must be trimmed as shown. Any deviation from trim size or arrangement may affect the proper operation of the valve.
- All pipe and fittings shall be galvanized or brass except when other materials are specified in the Technical Data for the Halar® Coated Flow Control Valve or when other materials are specified in the Viking Foam Systems data pages.
- Gauges are brass as furnished with trim.
- When the Viking Flow Control Valve is used on pre-mixed foam systems, trim piping must be of copper pipe with brass fittings unless otherwise specified in the Technical Data for the Halar® Coated Flow Control Valve or the Viking Foam Systems data pages.
- Dimensions in parentheses are millimeter and may be approximations.

Note 1: 1/2” (15 mm) NPT plugged outlet provided for connecting certain optional components and associated trim.

Note 2: Release System Connection: Viking deluge and flow control valves are compatible with hydraulic, pneumatic, and electric release systems. A pneumatic actuator is required on all Viking deluge valves and flow control valves equipped with pneumatic release systems.

Note 3: Alarm Connections: Connect alarm line piping to 3/4” (20 mm) NPT outlet. When using a water motor alarm, a strainer is required. 1/2” (15 mm) NPT outlet is for electric alarm pressure switch.

Note 4: Optional non-interruptible connection for alarm pressure switch to activate electric alarm panel. Note: After the flow control valve trips, this location cannot be shut off. Alarms may operate until the outlet chamber of the flow control valve is de-pressurized below the set point of the alarm pressure switch.

Order Flow Control Valve Separately
