1. DESCRIPTION
Viking EC/QREC Ordinary Hazard ELO Fusible Element Pendent Sprinkler VK537 is a
thermosensitive spray sprinkler available in several different finishes and temperature ratings
to meet varying design requirements. The extra-large orifice produces the flows required to
meet Ordinary Hazard density requirements at lower pressures than standard orifice or large
orifice sprinklers. Pendent Sprinkler VK537 is UL Listed as standard response and quick
response. The special Polyester and Electroless Nickel PTFE (ENT) coatings can be used
in decorative applications where colors are desired. In addition, the ENT coating has been
investigated for installation in corrosive environments and is approved as indicated in the ap-
proval chart.

2. LISTINGS AND APPROVALS
  cULus Listed: Category VNIV
  Refer to the Approval Chart(s) and Design Criteria for Listing and/or Approval requirements
  that must be followed.
  cULus Listing requires the spacing between pendent VK537 sprinklers to be a mini-
mum of 12 ft. (3.7 m) to prevent cold soldering.

3. TECHNICAL DATA
   Specifications:
   Minimum Operating Pressure: Refer to the Approval Charts.
   Maximum Working Pressure: 175 psi (12 Bar).
   Factory tested hydrostatically to 500 psi (34.5 bar).
   Thread size: 3/4” NPT
   Nominal K-Factor: 11.2 U.S. (161.3 metric†)
   † Metric K-factor measurement shown is in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.
   Overall Length: 2-3/8” (61 mm)
   Material Standards:
   Sprinkler Frame: Brass UNS-C84400
   Deflector: Brass UNS-C26000
   Fusible Element Assembly: Nickel Alloy
   Trigger and Support: Stainless Steel UNS-S31600
   Seal and Insert Assembly: Copper UNS-C11000 and Stainless Steel UNS-S30400
   Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with PTFE Tape
   Screw: Brass UNS-C36000
   For ENT Coated Sprinklers: Belleville Spring-Exposed, Screw and Pip Cap-ENT Coated
   For Polyester Coated Sprinklers: Belleville Spring-Exposed
   Ordering Information: (Also refer to the current Viking price list.)
   Order EC/QREC Ordinary Hazard ELO Fusible Element Sprinklers by first adding the appropriate suffix for the sprinkler finish
   and then the appropriate suffix for the temperature rating to the sprinkler base part number.
   Finish Suffixes: Brass = A, Chrome = F, White Polyester = M-/W, Black Polyester = M-/B and ENT = JN
   Temperature Suffixes: 165 °F (74 °C) = C and 205 °F (96 °C) = E
   For example, sprinkler VK537 with a Brass finish and a 165 °F (74 °C) temperature rating = Part No. 14611AC
   Available Finishes And Temperature Ratings:
   Refer to Table 1.
   Accessories: (Also refer to the current Viking price list.)
   Sprinkler Wrenches:
   A. Standard Wrench: Part No. 05118CW/B (available since 1981)
   B. Wrench for recessed pendent sprinkler: Part No. 11663W/B**
      (available since 2001)
      **A ½” ratchet is required (not available from Viking).
   Sprinkler Cabinets:
   A. Six-head capacity: Part No. 01724A (available since 1971)
   B. Twelve-head capacity: Part No. 01725A (available since 1971)
4. INSTALLATION
Refer to appropriate NFPA Installation Standards.

5. OPERATION
During fire conditions, the heat-sensitive fusible element assembly disengages, releasing the seat and spring assemblies to open the waterway. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
Viking Sprinkler VK537 is available through a network of domestic and international distributors. See The Viking Corporation website for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
For details of warranty, refer to Viking's current list price schedule or contact Viking directly.

Sprinkler Finishes: Brass, Chrome, White Polyester³, Black Polyester³ and ENT⁴,⁵
Corrosion Resistant Finish: ENT⁴,⁵

Footnotes

1. Decorative sprinklers may not be color coded. The temperature rating is stamped on the deflector.
2. Based on NFPA-13. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.
3. For automatic sprinklers, the coatings indicated are applied to the exposed exterior surfaces only. Note that the spring is exposed on sprinklers with Polyester coatings.
4. The corrosion resistant coatings have passed the standard corrosion test required by the approving agencies indicated in the Approval Chart(s). These tests cannot and do not represent all possible corrosive environments. Prior to installation, verify through the end-user that the coatings are compatible with or suitable for the proposed environment. Note that the spring is exposed on sprinklers with ENT coatings. For ENT coated automatic sprinklers, the waterway is coated.
5. cULus Listed as corrosion resistant.

### Standard Response

- 16 ft. x 16 ft. (4.9 m x 4.9 m)
  - 256 ft² (23.8 m²)
  - 38 gpm @ 11.5 psi (143.9 L/min @ .79 Bar)
  - 51 gpm @ 20.7 psi (193.1 L/min @ 1.43 Bar)
- 18 ft. x 18 ft. (5.5 m x 5.5 m)
  - 324 ft² (30.1 m²)
  - 49 gpm @ 19.1 psi (185.5 L/min @ 1.32 Bar)
  - 65 gpm @ 33.7 psi (246.1 L/min @ 2.32 Bar)
- 20 ft. x 20 ft. (6.1 m x 6.1 m)
  - 400 ft² (37.2 m²)
  - 60 gpm @ 28.7 psi (227.1 L/min @ 1.98 Bar)
  - 80 gpm @ 51.0 psi (302.8 L/min @ 3.52 Bar)

### Quick Response (cULus only)

- 14 ft. x 14 ft. (4.3 m x 4.3 m)
  - 196 ft² (18.2 m²)
  - 30 gpm @ 7.2 psi (113.6 L/min @ .50 Bar)
  - 39 gpm @ 12.1 psi (147.7 L/min @ .84 Bar)

### Approved Temperature Ratings

- A - 165 °F (74 °C) and 205 °F (96 °C)
- B - 165 °F (74 °C)

### Approved Finishes

1. Brass, Chrome, White Polyester and Black Polyester
2. ENT

### Approved Escutcheons

- X - Standard surface-mounted escutcheons
- Y - Standard surface-mounted escutcheons or recessed with the Micromatic® Model E-1 or E-2 Recessed Escutcheon
- Z - Standard surface-mounted escutcheons or recessed with the Micromatic® Model E-1 Recessed Escutcheon

### Footnotes

1. Part number shown is the base part number. For complete part number, refer to current Viking price list schedule.
2. Metric K-factor measurement shown is when pressure is measured in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.
3. This chart shows listings and approvals available at time of printing. Check with the manufacturer for any additional approvals.
4. cULus Listed for use in the U.S. and Canada.
5. To determine “Minimum Water Supply Requirement” for areas of coverage where length and width of actual sprinkler spacing are not equal, select the “Maximum Sprinkler Spacing” from the chart that is equal to or greater than the larger of the actual spacing (length or width) dimensions used. Example: When using 10'-6” x 13'-0” sprinkler spacing, provide the “Minimum Water Supply Requirement” listed in the chart for 14'-0” x 14'-0” spacing. For areas of coverage smaller than shown, use the “Minimum Water Supply Requirement” in the appropriate hazard group for the next larger area listed. The distance from sprinklers to walls shall not exceed one-half the “Maximum Sprinkler Spacing” listed for the “Minimum Water Supply Requirement” used.
7. cULus Listed as corrosion resistant.
**DESIGN CRITERIA - UL**
(Also refer to Approval Chart 1 on page 3)

**cULus Listing Requirements:**
ECOH-ELO Fusible Element Pendent Sprinkler VK537 is cULus Listed as indicated in Approval Chart 1 for installation in accordance with the latest edition of NFPA 13 for extended coverage pendent sprinklers as indicated below:

- The minimum water supplies and maximum areas of coverage shown in the Approval Chart are designed to provide the following design densities: 0.15 gpm/ft² (6.1 mm/min) for Ordinary-Hazard Group I densities; 0.2 gpm/ft² (8.1 mm/min) for Ordinary-Hazard Group II densities.
- The sprinkler installation rules contained in NFPA 13 for extended coverage upright and pendent spray sprinklers must be followed with the exception that cULus Listing requires the spacing between pendent VK537 sprinklers to be a minimum of 12 ft. (3.7 m) to prevent cold soldering.
- Viking ECOH-ELO Fusible Element Pendent Sprinklers are cULus Listed for use in unobstructed construction, and noncombustible obstructed construction consisting of solid steel and/or concrete beams as defined in the latest edition of NFPA 13.
- Ceiling slope not to exceed 2/12 (9.5°).

Also, Viking ECOH-ELO Pendent Sprinkler VK537 is specifically cULus Listed for:

- For non-combustible obstructed construction within trusses or bar joists having non-combustible web members greater than 1” (25.4 mm) when applying the 4 times obstruction criteria rule as defined in NFPA 13 under “Obstructions to Sprinkler Discharge Pattern Development”.
- For installation under concrete tees when installed as follows:
  1. The stems of the concrete tee construction must be spaced between 3 ft (0.9 m) and 7 ft-6 in (2.3 m) on center. The depth of the concrete tees must not exceed 30 in (762 mm). The maximum permitted concrete tee length is 32 ft (9.8 m). However, where the concrete tee length exceeds 32 ft (9.8 m), non-combustible baffles, equal in height to the depth of the tees, can be installed so that the space between the tees does not exceed 32 ft (9.8 m).
  2. The sprinkler deflector is to be located in a horizontal plane at or above 1” (25.4 mm) beneath the bottom of the concrete tee stems.
  3. When the sprinkler deflector is located higher than a horizontal plane 1” (25.4 mm) beneath the bottom of the concrete tee stems, the obstruction to sprinkler discharge criteria requirements of NFPA 13 for extended coverage upright sprinklers applies.

**IMPORTANT:** Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to pages F_080614 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

---

**Step 1:** Carefully slide the wrench sideways around the deflector, ensuring engagement with the sprinkler wrench flats.

Sprinkler wrench 13577W/B** must be used for installing wax coated sprinklers.

**A 1/2” ratchet is required (not available from Viking)**

**Step 2:** Carefully press the wrench upward and ensure engagement with the sprinkler wrench flats.
