1. DESCRIPTION

Viking Micromatic® Standard Response Conventional (Old Style) VK118 Sprinklers are small, thermosensitive, glass-bulb spray sprinklers available in several different finishes, temperature ratings, and K-Factors to meet design requirements. The special Polyester, and Electroless Nickel PTFE (ENT), coatings can be used in decorative applications where colors are desired. In addition, these coatings have been investigated for installation in corrosive atmospheres and are listed as corrosion resistant as indicated in the Approval Chart.

Viking standard response sprinklers may be ordered and/or used as open sprinklers (glass bulb and pip cap assembly removed) on deluge systems. Refer to Ordering Instructions in section 3.

**Ordering Information:** (Also refer to the current Viking price list.)
Order Micromatic® Standard Response Conventional Sprinkler VK118 by first adding the appropriate suffix for the sprinkler finish and then the appropriate suffix for the temperature rating to the sprinkler base part number.

**Finish Suffix:** Brass = A, Chrome = F, White Polyester = M/-W, Black Polyester = M/-B, Wax Coated = C, Wax Over Polyester = V-W, and ENT = JN

**Temperature Suffix** (°F/°C): 135°/57° = A, 155°/68° = B, 175°/79° = D, 200°/93° = E, 212°/100° = M, 286°/141° = G, 360°/182° = H. For example, sprinkler VK118 with a 1/2" thread, Brass finish and a 155 °F/68 °C temperature rating = Part No. 19383AB

B. Twelve-head capacity: Part No. 01725A (available since 1971)

4. INSTALLATION
   Refer to appropriate NFPA Installation Standards.

5. OPERATION
   During fire conditions, the heat-sensitive liquid in the glass bulb expands, causing the glass to shatter, releasing the pip cap and sealing spring assembly. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
   Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
   The Viking Micromatic® Standard Response Conventional Sprinkler VK118 is available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
   For details of warranty, refer to Viking’s current list price schedule or contact Viking directly.

**Sprinkler Finishes:** Brass, Chrome, White Polyester, Black Polyester, and Black PTFE

**Corrosion-Resistant Coatings\(^4\):** White Polyester, Black Polyester, and ENT\(^4\) in all temperature ratings except 135 °F (57 °C). Wax-Coated Brass and Wax over Polyester\(^5\) for sprinklers with the following temperature ratings:
- 155 °F (68 °C) Lt. Brown Wax
- 175 °F (79 °C) Brown Wax
- 200 °F (93 °C) Brown Wax
- 286 °F (141 °C) Dk. Brown Wax\(^5\)

**Footnotes**

1. The sprinkler temperature rating is stamped on the deflector.
2. Based on NFPA-13. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.
3. Sprinklers of Ultra-High temperature rating are intended for use inside ovens, dryers, or similar enclosures with normal operating temperatures above 300 °F (149 °C). Where the ambient temperature around the Ultra-High temperature rated sprinkler is significantly reduced below 300 °F (149 °C), response time may be severely retarded.
4. The corrosion-resistant coatings have passed the standard corrosion test required by the approving agencies indicated in the Approval Charts. These tests cannot and do not represent all possible corrosive environments. Prior to installation, verify through the end-user that the coatings are compatible with or suitable for the proposed environment. For automatic sprinklers, the coatings indicated are applied to the exposed exterior surfaces only. Note that the spring is exposed on sprinklers with Polyester, and ENT coatings. For ENT coated open sprinklers only, the waterway is coated.
5. Wax melting point is 170 °F (76 °C) for 286 °F (141 °C) temperature rated sprinklers.
