Visit the Viking website for the latest edition of this technical data page [www.vikinggroupinc.com](http://www.vikinggroupinc.com)

### 1. DESCRIPTION

Viking Cover Plates are low-profile covers used with Viking Concealed Sprinklers. Push-On or Thread-On versions are available for most sprinkler models. The covers are installed flush with the ceiling or wall to provide a smooth appearance, and are available in several [standard decorative finishes](#) to meet design requirements. Viking Cover Plates may also be custom ordered with any color by any paint manufacturer. In addition, customized screen printing is available on select cover plates. Refer to Figure 2 and Table 4 for more information.

### 2. LISTINGS AND APPROVALS

Refer to the Approval Charts on the applicable Viking Sprinkler Technical Data Pages.

**UL Listed Screen Print** - Brass, Painted, or Stainless Steel only. Refer to Figure 2.

**FM Approved Screen Print** - Brass, Painted, or Stainless Steel only. Refer to Figure 2.

### 3. TECHNICAL DATA

#### Specifications:

Refer to the appropriate sprinkler technical page for sprinkler specifications.

#### Material Standards:

Cover Plate Assembly: Copper UNS-C11000, Brass UNS-C26000, UNS-C26800, or Stainless Steel UNS-S30400

Spring: Nickel Alloy

Solder: Eutectic (non-Eutectic for cover 15765)

**Ordering Information:** (Also refer to the current Viking price list.)

Refer to Tables 1 and 2.

Specify finish and temperature rating of the cover plate assembly by adding the appropriate suffixes for the finish and the cover temperature rating to the base part number:

For example, cover 23190 with a Polished Chrome finish and a 165 °F (74 °C) temperature rating = 23190FC.

#### Available Finishes And Temperature Ratings:

Refer to Tables 1 - 2.

### 4. INSTALLATION\*

A. After installation of the Concealed Sprinkler, testing of the system, repairing of all leaks, and installation and painting of the wall or ceiling, the concealed sprinkler cover plate assembly may be attached.

1. Remove the plastic protective cap from the sprinkler.

2. Remove the cover plate assembly from the protective box, taking care not to damage the assembly.

3. Gently place the base of the cover plate assembly over the sprinkler protruding through the opening\*\* in the ceiling or wall.

\*\*Size depends on the sprinkler model used. Refer to appropriate sprinkler data page.

4. Carefully push or thread the cover plate assembly onto the sprinkler, using even pressure with the palm of the hand, until the unfinished brass flange of the cover plate base (or the cover adapter, if used) touches the surface of the ceiling or wall. The maximum adjustment available is 1/2" (12.7 mm) [1/4" (6.4 mm) for sprinklers VK480, VK481 and VK680]. DO NOT MODIFY THE UNIT. If necessary, re-cut the sprinkler nipple.

B. DISASSEMBLY: Cover plates can be removed either by gently unthreading them or pulling them off the sprinkler body (depends on the sprinkler model used).

C. RE-ASSEMBLY: The push-on or thread-on feature of these cover plate assemblies allows easy installation of the cover plates.

1. Gently place the base of the cover plate assembly over the sprinkler.

2. Push or thread the cover plate assembly onto the sprinkler, using even pressure with the palm of the hand, until the unfinished brass flange of the cover plate base touches the ceiling or wall.

\* See the care and handling Cautions and guidelines on the last page of this document for important safety information.

### 5. OPERATION

During fire conditions, when the temperature around the sprinkler approaches its operating temperature, the cover plate detaches. Continued heating of the sprinkler causes the operating element to fuse or shatter (depending on the type of sprinkler), releasing the sealing assembly. Water flowing through the sprinkler orifice strikes the deflector or flow shaper, forming a uniform spray pattern to extinguish or control the fire.

### 6. INSPECTIONS, TESTS AND MAINTENANCE

Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

### 7. AVAILABILITY

Viking concealed sprinklers and cover assemblies are available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

### 8. GUARANTEE

For details of warranty, refer to Viking's current list price schedule or contact Viking directly.

CONCEALED COVER ASSEMBLIES ARE FRAGILE. TO ASSURE SATISFACTORY PERFORMANCE OF THE PRODUCT, HANDLE WITH CARE.

### NOTICE

FOR COMPLETE CARE, HANDLING, & INSTALLATION INSTRUCTIONS, REFER TO THE SPRINKLER DATA PAGE AND THE APPROPRIATE SPRINKLER GENERAL CARE, INSTALLATION, AND MAINTENANCE GUIDE.

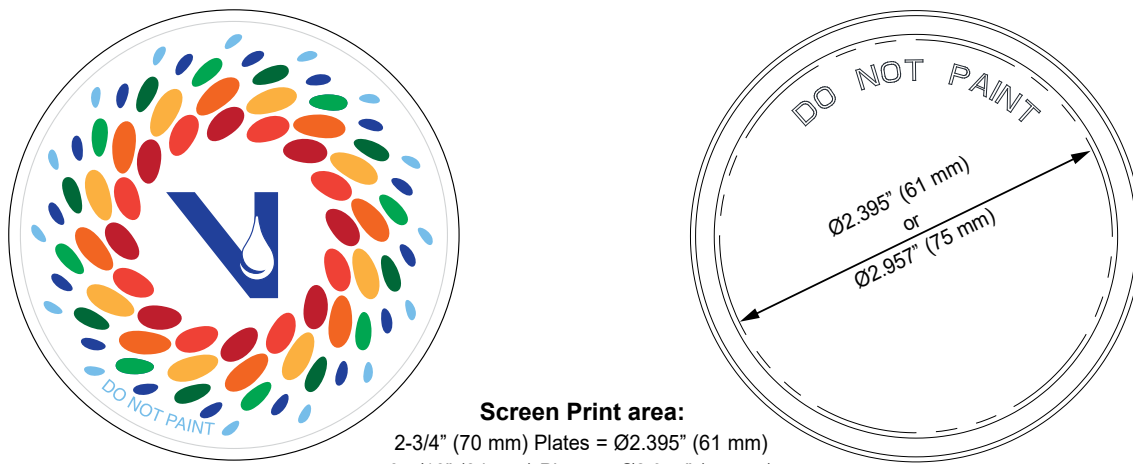

#### GENERAL HANDLING AND STORAGE INSTRUCTIONS:

- Do not store in temperatures exceeding 100 °F (38 °C). Avoid direct sunlight and confined areas subject to heat.
- Protect sprinklers and cover assemblies during storage, transport, handling, and after installation.
  - Use original shipping containers.
  - Do not place sprinklers or cover assemblies loose in boxes, bins, or buckets.
- Keep the sprinkler bodies covered with the protective sprinkler cap any time the sprinklers are shipped or handled, during testing of the system, and while finish work is being completed.
- Use only the designated Viking sprinkler wrench (refer to the appropriate sprinkler data page) to install these sprinklers. **NOTE:** The protective cap is temporarily removed during installation and then placed back on the sprinkler for protection until finish work is completed.
- Do not over-tighten the sprinklers into fittings during installation.
- Do not use the sprinkler deflector to start or thread the sprinklers into fittings during installation.
- Do not attempt to remove drywall, paint, etc., from the sprinklers.
- Remove the plastic protective cap from the sprinkler before attaching the cover plate assembly. **PROTECTIVE CAPS MUST BE REMOVED FROM SPRINKLERS BEFORE PLACING THE SYSTEM IN SERVICE!**
