1. DESCRIPTION
The Viking Standard/Quick Response Extended Coverage Light Hazard Extra-Large Orifice (ECLH-ELO/QRECLH-ELO) Pendent Sprinkler VK608 is a thermosensitive spray sprinkler available in several different finishes and temperature ratings to meet varying design requirements. The glass bulb operating element and special deflector characteristics meet the challenges of quick response extended coverage standards. The sprinkler has both quick response and standard response listings as indicated in the Approval Charts on pages 3-4. The special Polyester and Electroless Nickel PTFE (ENT) coatings can be used in decorative applications where colors are desired. In addition, the ENT coating has been investigated for installation in corrosive atmospheres. Refer to the Approval Charts.

2. LISTINGS AND APPROVALS
- cULus Listed: Category VNIV
- FM Approved: Class 2020
- NYC Approved: MEA 89-92-E, Volume 9

Refer to Approval Chart 1 and Design Criteria on pages 3-4 for cULus Listing requirements, and refer to Approval Chart 2 and Design Criteria on page 5 for FM Approval requirements that must be followed.

3. TECHNICAL DATA
Specifications:
- Minimum Operating Pressure: Refer to the Approval Charts.
- Maximum Operating Pressure: 175 psi (12 Bar). Factory tested hydrostatically to 500 psi (34.5 bar).
- Factory tested hydrostatically: 500 psi (34.5 bar).
- Thread size: 3/4" NPT (20 mm)
- Nominal K-Factor: 11.2 U.S. (161.3 metric†)

† Metric K-factor measurement shown is in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.
- Glass-bulb fluid temperature rating: -65 °F (-55 °C)
- Overall Length: 2-5/16" (59 mm)

Material Standards:
- Sprinkler Frame: Brass UNS-C84400
- Deflector: Brass UNS-C51000
- Bulb: Glass, nominal 3 mm diameter
- Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with PTFE Tape
- Screw: Brass UNS-C36000
- Pip Cap and Insert Assembly: Leaded Bronze UNS-C31600 or UNS-C31400
- For Polyester Coated Sprinklers: Belleville Spring-Exposed
- For ENT Coated Sprinklers: Belleville Spring-Exposed, Screw and Pipcap-ENT plated.

Ordering Information:
(Also refer to the current Viking price list.)
- Order Standard/Quick Response Extended Coverage Light Hazard Extra-Large Orifice (ECLH-ELO) Pendent Sprinkler VK608 by first adding the appropriate suffix for the sprinkler finish and then the appropriate suffix for the temperature rating to the sprinkler base part number.
- Finish Suffixes: Brass = A, Chrome = F, White Polyester = M/-W, Black Polyester = M/-B, and ENT=JN
- Temperature Suffixes: 135 °F (57 °C) = A, 155 °F (68 °C) = B, 175 °F (79 °C) = D
- For example, sprinkler VK608 with a Brass finish and a 155 °F (68 °C) temperature rating = Part No. 08339AB

Available Finishes And Temperature Ratings: Refer to Table 1.

Accessories: (Also refer to the the current Viking price list.)

For Light Hazard Occupancies
NOTE: As of May 2018 all logos have been removed from the wrench boss.

WARNING: Cancer and Reproductive Harm—www.P65Warnings.ca.gov
Sprinkler Wrenches:
A. Standard Wrench: Part No. 05118CW/B (available since 1981)
B. Wrench for recessed pendent sprinkler: Part No. 11663W/B (available since 2001)
   **A ½” ratchet is required (not available from Viking).**

Sprinkler Cabinets:
A. Six-head capacity: Part No. 01724A (available since 1971)
B. Twelve-head capacity: Part No. 01725A (available since 1971)

4. INSTALLATION
Refer to the appropriate NFPA and FM Installation Standards.

5. OPERATION
During fire conditions, the heat-sensitive liquid in the glass bulb expands, causing the glass to shatter, releasing the pip cap and sealing spring assembly. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
Viking Sprinkler VK608 is available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
For details of warranty, refer to Viking’s current list price schedule or contact Viking directly.

### Table 1: Available Sprinkler Temperature Ratings and Finishes

<table>

Sprinkler Finishes: Brass, Chrome, White Polyester³, Black Polyester³, and ENT⁴

Corrosion-Resistant Coatings⁴: ENT

**Footnotes**

¹ The sprinkler temperature rating is stamped on the deflector.
² Based on NFPA-13. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.
³ For automatic sprinklers, the coatings indicated are applied to the exposed exterior surfaces only. Note that the spring is exposed on sprinklers with Polyester and ENT coatings. For ENT automatic sprinklers, the waterway is coated.
⁴ The corrosion-resistant coatings have passed the standard corrosion test required by the approving agencies indicated in the Approval Chart. These tests do not represent all possible corrosive environments. Prior to installation, verify through the end-user that the coatings are compatible with or suitable for the proposed environment. For ENT automatic sprinklers, all exposed surfaces and the waterway are coated, but note that the spring is exposed.

### Approved Temperature Ratings

| A | 135 °F (57 °C), 155 °F (68 °C), and 175 °F (79 °C) |
| B | 135 °F (57 °C) and 175 °F (79 °C) |
| C | 155 °F (68 °C) |

### Approved Finishes

1. Brass, Chrome, White Polyester, and Black Polyester
2. ENT®

### Approved Escutcheons

Y - Standard surface-mounted escutcheons or recessed with the Micromatic® Model E-1, E-2, or E-3 Recessed Escutcheon
Z - Standard surface-mounted escutcheons or the Micromatic Model E-1 Recessed Escutcheon.

### Footnotes

1. The part number shown is the base part number. For the complete part number, refer to the current Viking price list schedule.
2. Metric K-factor measurement shown is when pressure is measured in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.
3. This chart shows listings and approvals available at time of printing; other approvals may be in process. Check with the manufacturer for any additional approvals.
4. For areas of coverage smaller than those shown, use the “Minimum Water Supply Requirements” for the next larger area listed. Flows and pressures listed are per sprinkler.
5. cULus Listed for use in the U.S. and Canada for Light Hazard occupancies only.
6. Listings are limited to Light Hazard Occupancies where allowed by the installation standards being applied.
7. Accepted for use, City of New York Department of Buildings, MEA 89-92 Vol. 9.
9. cULus Listed as corrosion-resistant.

---

**Figure 2: Wrench 11663W/B for Recessed Pendent Sprinkler VK608**

---

**Sprinkler Wrench 11663W/B** must be used for installing recessed Sprinkler VK608.

***A 1/2” ratchet is required (not available from Viking).***

---

**Step 1:** Carefully slide the wrench sideways around the deflector and protective shield.

(Note the orientation of the shield in the wrench.)

**Step 2:** Carefully press the wrench upward and turn slightly to ensure engagement with the sprinkler wrench flats.
DESIGN CRITERIA - UL
(Also refer to the Approval Chart on page 3.)

**cULus Listing Requirements:**
Standard/Quick Response Extended Coverage Light Hazard ELO Pendent Sprinkler VK608 is cULus Listed as indicated in the Approval Chart for installation in accordance with the latest edition of NFPA 13 for extended coverage pendent spray sprinklers. The following requirements must be met:

- Limited to Light Hazard occupancies, where allowed by the installation standards being applied, with smooth, flat, horizontal ceilings only.
- Minimum spacing allowed is 8 ft. (2.4 m) unless baffles are installed in accordance with NFPA 13.
- Minimum distance from walls is 4 in. (102 mm).
- Maximum distance from walls shall be no more than one-half of the allowable distance between sprinklers. The distance shall be measured perpendicular to the wall.
- The sprinkler installation and obstruction rules contained in NFPA 13 for extended coverage pendent spray sprinklers must be followed.

**Also, Viking ECLH-ELO Pendent Sprinkler VK608 is specifically cULus Listed:**

- For non-combustible obstructed construction within trusses or bar joists having non-combustible web members greater than 1” (25 mm) when applying the 4 times obstruction criteria rule as defined in NFPA 13 under “Obstructions to Sprinkler Discharge Pattern Development”.
- For installation under concrete tees when installed as follows:
  1. The stems of the concrete tee construction must be spaced between 3 ft (0.9 m) and 7 ft-6 in. (2.3 m) on center. The depth of the concrete tees must not exceed 30 in. (762 mm). The maximum permitted concrete tee length is 32 ft (9.8 m). However, where the concrete tee length exceeds 32 ft (9.8 m), non-combustible baffles, equal in height to the depth of the tees, can be installed so that the space between the tees does not exceed 32 ft (9.8 m).
  2. The sprinkler deflector is to be located in a horizontal plane at or above 1” (25 mm) below the bottom of the concrete tee stems.
  3. When the sprinkler deflector is located higher than a horizontal plane 1” (25 mm) beneath the bottom of the concrete tee stems, the obstruction to sprinkler discharge criteria requirements of NFPA 13 for extended coverage upright sprinklers applies.

**IMPORTANT:** Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to pages F_080614 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking Technical Data, the appropriate standards of NFPA, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

3. This chart shows the FM Approvals available at time of printing. Other approvals may be in process. Check with the manufacturer for any additional approvals.
4. For areas of coverage smaller than shown, use the “Minimum Water Supply Requirement” for the next larger area listed. Flows and pressures listed are per sprinkler.
5. FM Approved as corrosion-resistant.

---

**DESIGN CRITERIA - FM**

(Also refer to the Approval Chart above.)

**FM Approval Requirements:**

Quick Response Extended Coverage Extra-Large Orifice Pendent Sprinkler VK608 is FM Approved as a quick response extended coverage pendent Non-Storage sprinkler as indicated in the FM Approval Guide. For specific application and installation requirements, refer to the latest applicable FM Loss Prevention Data Sheets (including 2-0). FM Global Loss Prevention Data Sheets contain guidelines relating to, but not limited to: minimum water supply requirements, hydraulic design, ceiling slope and obstructions, minimum and maximum allowable spacing, and deflector distance below the ceiling.

**NOTE:** The FM installation guidelines differ from cULus and/or NFPA criteria.

**IMPORTANT:** Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to pages F_080614 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, FM Global, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.
