1. DESCRIPTION

Viking Standard Response Fusible Link Pendent Sprinkler VK206 is a small thermosensitive solder link spray sprinkler available with various finishes and temperature ratings to meet design requirements. The special Polyester and Electroless Nickel PTFE (ENT) coatings can be used in decorative applications where colors are desired. In addition, these coatings have been investigated for installation in corrosive environments and are Listed and Approved as indicated in the approval chart(s).

2. LISTINGS AND APPROVALS

- cULus Listed: Category VNIV
- FM Approved: Classes 2001 and 2005

Refer to the Approval Chart(s) and Design Criteria for Listing and/or Approval requirements that must be followed.

3. TECHNICAL DATA

Specifications:
- Minimum Operating Pressure: 7 psi (0.5 bar)
- Maximum Working Pressure: 175 psi (12 bar) wwp
- Factory tested hydrostatically to 500 psi (34.5 bar)
- Thread size: 1/2” NPT, 15 mm BSPT, 3/4” NPT, 20 mm BSPT
- Nominal K-Factor: 8.0 U.S. (115.2 metric**)
- Overall Length: 2-1/4” (58 mm)

** Metric K-factor measurement shown is in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.

Material Standards:
- Frame Casting: Brass UNS-C84400 or QM Brass
- Deflector: Copper UNS-C19500
- Fusible Link Assembly: Brass UNS-C51000

*NOTE: For chrome sprinklers, the fusible link assembly is painted silver for decorative purposes only.

Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with PTFE Tape
- Screw: Stainless Steel UNS-S30300
- Seat: Copper UNS-C11000 or Stainless Steel UNS-S30400

For Polyester Coated Sprinklers:
- Belleville Spring-Exposed

For ENT Coated Sprinklers:
- Belleville Spring-Exposed, Screw and Pip Cap-ENT Coated

Ordering Information:

Order Viking Standard Response Fusible Link Pendent Sprinkler VK206 by first adding the appropriate suffix for the sprinkler finish and then the appropriate suffix for the temperature rating to the sprinkler base part number.

Finish Suffix: Brass = A, Chrome = F, White Polyester = M/N, Black Polyester = M/B, Wax Coated = C, and ENT = JN

Temperature Suffix: 165 °F (74 °C) = C, 220 °F (104 °C) = F, 286 °F (141 °C) = G

For example, sprinkler VK206 with a 3/4” thread, Brass finish and a 165 °F (74 °C) temperature rating = Part No. 18254AC

Available Finishes And Temperature Ratings: Refer to Table 1.

Accessories: (Also refer to the Viking website.)

Sprinkler Wrenches:
- B. Standard Wrench for Wax Coated Sprinklers: Part No. 10896W/B (available since 2000)
- C. Socket Wrench for Wax Coated Sprinklers: Part No. 13577W/B* (available since 2006)

* A 1/2” ratchet is required (not available from Viking).

Sprinkler Cabinets:
- A. Six-head capacity: Part No. 01724A (available since 1971)
- B. Twelve-head capacity: Part No. 01725A (available since 1971)
4. INSTALLATION
Refer to appropriate NFPA Installation Standards.

5. OPERATION
During fire conditions, the heat-sensitive fusible link disengages, the pip cap and spring are released, and the waterway is opened. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
The Viking Standard Response Fusible Link Pendent Sprinkler VK206 is available through a network of domestic and international distributors. See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
For details of warranty, refer to Viking's current list price schedule or contact Viking directly.

Sprinkler Finishes: Brass, Chrome, White Polyester, Black Polyester, and ENT

Corrosion-Resistant Coatings⁴: White Polyester, Black Polyester, and ENT⁶ in all temperature ratings. Wax-Coated Brass for sprinklers with the following temperature ratings:
165 °F (74 °C) Lt. Brown Wax  220 °F (104 °C) Dark Brown Wax⁵

Footnotes

¹ The sprinkler temperature rating is stamped on the deflector.
² Based on NFPA-13. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.
³ Sprinklers of Ultra-High temperature rating are intended for use inside ovens, dryers, or similar enclosures with normal operating temperatures above 300 °F (149 °C). Where the ambient temperature around the Ultra-High temperature rated sprinkler is significantly reduced below 300 °F (149 °C), response time may be severely retarded.
⁴ The corrosion resistant coatings have passed the standard corrosion test required by the approving agencies indicated in the Approval Chart(s). These tests cannot and do not represent all possible corrosive environments. Prior to installation, verify through the end-user that the coatings are compatible with or suitable for the proposed environment. For automatic sprinklers, the coatings indicated are applied to the exposed exterior surfaces only. Note that the spring is exposed on sprinklers with Polyester and ENT coatings. For ENT coated automatic sprinklers, the waterway is coated.
⁵ Wax melting point is 170 °F (76 °C) for 220 °F (104 °C) temperature-rated sprinklers.
⁶ cULus Listed as corrosion resistant.

Step 1: Carefully slide the wrench sideways around the deflector, ensuring engagement with the sprinkler wrench flats.

{Diagram of Step 1}

Wax Coated Pendent Sprinkler
Sprinkler wrench 13577W/B** must be used for installing wax coated sprinklers.

** A 1/2” ratchet is required (not available from Viking)

Step 2: Carefully press the wrench upward and ensure engagement with the sprinkler wrench flats.

**Footnotes**

[^1]: Base part number is shown. For complete part number, refer to Viking's current price schedule.

[^2]: Metric K-factor shown is for use when pressure is measured in bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.

[^3]: This table shows the listings and approvals available at the time of printing. Check with the manufacturer for any additional approvals.

[^4]: Listed by Underwriters Laboratories Inc. for use in the U.S. and Canada.

[^5]: cULus Listed as corrosion resistant.

[^6]: Other colors are available on request with the same Listings and Approvals as the standard colors.

[^7]: The 1/2" NPT Large Orifice Sprinkler is Listed and Approved for retrofit only.

---

**DESIGN CRITERIA - UL**

(Also refer to Approval Chart 1.)

**cULus Listing Requirements:**

Viking Standard Response Fusible Link Pendent Sprinkler VK206 is cULus Listed as indicated in Approval Chart 1 for installation in accordance with the latest edition of NFPA 13 for standard spray sprinklers.

Designed for use in Light, Ordinary, and Extra Hazard occupancies.

The sprinkler installation rules contained in NFPA 13 for standard spray pendent sprinklers must be followed.

**IMPORTANT:** Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to Form No. F_080614 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.

### DESIGN CRITERIA - FM

(Also refer to Approval Chart 2.)

**FM Approval Requirements:**

Sprinkler VK206 is FM Approved as a standard response Non-Storage pendent sprinkler as indicated in the FM Approval Guide. For specific application and installation requirements, reference the latest applicable FM Loss Prevention Data Sheets (including Data Sheet 2-0). FM Global Loss Prevention Data Sheets contain guidelines relating to, but not limited to: minimum water supply requirements, hydraulic design, ceiling slope and obstructions, minimum and maximum allowable spacing, and deflector distance below the ceiling.

**NOTE:** The FM installation guidelines may differ from cULus and/or NFPA criteria.

**IMPORTANT:** Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to Form No. F_080614 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, FM Global, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.
