1. DESCRIPTION

Viking Stainless Steel Dry Pendent Sprinklers are thermosensitive spray sprinklers suitable for use in areas subject to freezing. The sprinklers are designed for dry systems and preaction systems where it is necessary to prevent water or condensation from entering the drop nipple before sprinkler operation. They may also be installed in spaces subject to freezing and supplied from a wet system in an adjacent heated area.

Viking Standard Response Dry Pendent Sprinklers are available in various finishes and temperature ratings, to meet design requirements. **These sprinklers are not listed as corrosion-resistant sprinklers, and are not intended for use in corrosive environments.**

2. LISTINGS AND APPROVALS

NOTE: Viking Stainless Steel Dry Pendent Sprinklers carry no listings or approvals.

Viking Stainless Steel Dry Pendent Sprinklers are not intended for use in corrosive environments. Use only sprinklers listed for corrosive environments when subject to corrosive atmospheres.

Ordering Information: (Also refer to the current Viking price list.)

Order Stainless Steel Dry Pendent Sprinklers by first adding the appropriate suffix for the temperature rating, and then the suffix for the length ("A" dimension) to sprinkler base part number. Order in a specific length noted as the "A" dimension (see Figures 3 through 5). The "A" dimension is the distance from the face of the fitting (tee) to the desired finished surface of the ceiling.

These sprinklers may be ordered in standard lengths from 3" to 47" (76.2 mm to 1,194 mm) for the plain barrel style, and 3-1/4" to 47-1/2" (82.5 mm to 1,207 mm) for the adjustable recessed style.

Lengths exceeding the standard lengths are available on a "made-to-order" basis: Recessed Dry Pendent up to 65-1/2" (1,664 mm). Plain Barrel Dry Pendent up to 65" (1,651 mm). Contact the manufacturer for more information.

Temperature Suffix: 155 °F (68 °C) = B, 175 °F (79 °C) = D, 200 °F (93 °C) = E, 286 °F (141 °C) = G

For example, sprinkler VK169 with 1" NPT Threads, a 155 °F (68 °C) temperature rating, and "A" length of 10" = Part No. 10360UB10.

Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE

Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.
