Notes: For use with Trim Chart on Page 2

General Notes:

• Valve must be trimmed as shown. Any deviation from trim size or arrangement may affect the proper operation of the valve.
• All pipe and fittings shall be galvanized or brass except when other materials are specified in the Technical Data for the Halar® Coated Flow Control Valve or when other materials are specified in the Viking Foam Systems data pages.
• Gauges are brass as furnished with trim.
• When the Viking Flow Control Valve is used on pre-mixed foam systems, trim piping must be of copper pipe with brass fittings unless otherwise specified in the Technical Data for the Halar® Coated Flow Control Valve or the Viking Foam Systems data pages.
• Dimensions in parentheses are millimeter and may be approximations.

Note 1: 1/2" (15 mm) NPT plugged outlet provided for connecting certain optional components and associated trim.

Note 2: Release System Connection: Viking deluge and flow control valves are compatible with hydraulic, pneumatic, and electric release systems. A pneumatic actuator is required on all Viking deluge valves and flow control valves equipped with pneumatic release systems.

Note 3: Alarm Connections: Connect alarm line piping to 3/4" (20 mm) NPT outlet. When using a water motor alarm, a strainer is required. 1/2" (15 mm) NPT outlet is for electric alarm pressure switch.

Note 4: Optional non-interruptible connection for alarm pressure switch to activate electric alarm panel. Note: After the flow control valve trips, this location cannot be shut off. Alarms may operate until the outlet chamber of the flow control valve is de-pressurized below the set point of the alarm pressure switch.
TECHNICAL DATA

2-1/2" & 3" (DN65 & DN80)
MODEL J FLOW CONTROL VALVE
HORIZONTAL STAINLESS STEEL TRIM CHART
Maximum 250 PSI Water Working Pressure
