1. DESCRIPTION
The Viking Microfast® EC/QREC Fusible Element Horizontal Sidewall Sprinkler VK609 is a small thermosensitive solder link spray sprinkler available with various finishes and temperature ratings to meet design requirements. The VK609 has both standard response and quick response listings. The fusible operating element and special deflector characteristics meet the challenges of quick response extended coverage standards. The special Polyester and ENT coatings can be used in decorative applications where colors are desired. The Electroless Nickel PTFE (ENT) coating has been investigated for installation in corrosive environments and is listed and approved as indicated in the Approval Chart(s).

2. LISTINGS AND APPROVALS

   cULus Listed: Category VNIV
   Refer to Approval Chart 1 and Design Criteria for cULus Listing requirements that must be followed.

3. TECHNICAL DATA

   Specifications:
   Minimum Operating Pressure: 7 psi (0.5 bar)
   Maximum Working Pressure: 175 psi (12 bar).
   Factory tested hydrostatically to 500 psi (34.5 bar)
   Deflector (Sprinkler 13949): U.S.A. Patent No. 4,296,816
   Thread Size: 1/2" (15 mm) NPT
   Nominal K-Factor: 5.6 U.S. (80.6 metric*)

   *Metric K-factor measurement shown is when pressure is measured in Bar. When pressure is measured in kPa, divide the metric K-factor shown by 10.0.
   Overall Length: 2-11/16" (68 mm)

   Material Standards:
   Frame Casting: Brass UNS-C84400
   Deflector: Phosphor Bronze UNS-C51000
   Fusible Element Assembly: Nickel Alloy
   Trigger and Support: Stainless Steel UNS-S31600
   Belleville Spring Sealing Assembly: Nickel Alloy, coated on both sides with PTFE Tape
   Seat and Insert Assembly: Copper UNS-C11000 and Stainless Steel UNS-S30400
   Screw: Brass UNS-C36000
   For ENT Coated Sprinklers: Belleville Spring-Exposed, Screw and Pip Cap-ENT Coated
   For Polyester Coated Sprinklers: Belleville Spring-Exposed

   Ordering Information: (Also refer to the current Viking price list.)
   Order Quick Response Horizontal Sidewall Fusible Element Sprinkler VK609 by first adding the appropriate suffix for the sprinkler finish and then the appropriate suffix for the temperature rating to the sprinkler base part number.
   Finish Suffix: Brass = A, Chrome = F, White Polyester = M-/W, Black Polyester = M-/B, and ENT = JN
   Temperature Suffix: 165 °F / 74 °C = C and 205 °F / 96 °C = E
   For example, sprinkler VK609 with a Brass finish and a 165 °F / 74 °C temperature rating = Part No. 13971AC

   Available Finishes And Temperature Ratings: Refer to Table 1.
   Accessories: (Also refer to the Viking website.)
   Sprinkler Wrenches:
   A. Standard Wrench: Part No. 21475M/B (available since 2017).
   B. Wrench for recessed sprinklers with protective shields: Part No. 13655W/B** (available since 2003)
     **A ½" ratchet is required (not available from Viking).
   Sprinkler Cabinets:
   A. Six-head capacity: Part No. 01724A (available since 1971)
   B. Twelve-head capacity: Part No. 01725A (available since 1971)
4. INSTALLATION
   Refer to appropriate NFPA Installation Standards.

5. OPERATION
   During fire conditions, the heat-sensitive fusible element assembly disengages, releasing the seat and spring assemblies to open
   the waterway. Water flowing through the sprinkler orifice strikes the sprinkler deflector, forming a uniform spray pattern to extinguish
   or control the fire.

6. INSPECTIONS, TESTS AND MAINTENANCE
   Refer to NFPA 25 for Inspection, Testing and Maintenance requirements.

7. AVAILABILITY
   Viking Quick Response Horizontal Sidewall Sprinklers are available through a network of domestic and international distributors.
   See The Viking Corporation web site for the closest distributor or contact The Viking Corporation.

8. GUARANTEE
   For details of warranty, refer to Viking’s current list price schedule or contact Viking directly.

Sprinkler Finishes: Brass, Chrome, White Polyester\(^3\), Black Polyester\(^3\), and ENT\(^4,5\)

Corrosion Resistant Finish: ENT\(^4,5\)

Footnotes

1 Decorative sprinklers may not be color coded. The temperature rating is stamped on the deflector.
2 Based on NFPA-13. Other limits may apply, depending on fire loading, sprinkler location, and other requirements of the Authority Having Jurisdiction. Refer to specific installation standards.
3 For automatic sprinklers, the coatings indicated are applied to the exposed exterior surfaces only. Note that the spring is exposed on sprinklers with Polyester coatings.
4 The corrosion-resistant coatings have passed the standard corrosion test required by the approving agencies indicated in the Approval Chart. These tests cannot and do not represent all possible corrosive environments. Prior to installation, verify through the end-user that the coatings are compatible with or suitable for the proposed environment. For ENT sprinklers, the waterway is coated. Note that the spring is exposed on sprinklers with ENT coatings
5 cULus Listed as corrosion resistant.

Step 1: Carefully slide the wrench sideways around the deflector, ensuring engagement with the sprinkler wrench flats.

Sprinkler wrench 13655W/B**

must be used for installing wax coated sprinklers.

** A 1/2" ratchet is required
(not available from Viking)

Step 2: Carefully press the wrench onto the sprinkler wrench flats.

### Approved Temperature Ratings
- A - 165 °F (74 °C) and 205 °F (96 °C)
- B - 165 °F (74 °C)
- C - 205 °F (96 °C)

### Approved Finishes
- 1 - Brass, Chrome, White Polyester, and Black Polyester
- 2 - ENT³

### Approved Escutcheons
- X - Installed with standard surface-mounted escutcheons or recessed with the Viking Micromatic® Model E-1, E-2, or G-1 Recessed Escutcheon
- Y - Installed with standard surface-mounted escutcheons or recessed with the Viking Micromatic Model E-1 Recessed Escutcheon

### Footnotes
1. Base part number is shown. For complete part number, refer to current Viking price list schedule.
2. Metric K-factor shown is for use when pressure is measured in kPa. When pressure is measured in bar, multiply the metric K-factor by 10.0.
3. This chart shows listings and approvals available at time of printing. Check with the manufacturer for any additional approvals.
4. Listed by Underwriter’s Laboratories, Inc. for use in Canada.
5. Meets New York City requirements, effective July 1, 2008.
6. Listings and Approvals are limited to Light Hazard Occupancies where allowed by the installation standards being applied.
7. For areas of coverage smaller than shown, use the “Minimum Water Supply Requirement” for the next larger listed area of coverage with sprinklers of similar K-Factor.
8. Listed area of coverage measured along ceiling slope. Consult Figure 6 for installation notes.
9. cULus Listed as corrosion resistant.
cULus Listing Requirements: Microfast® EC/QREC Horizontal Sidewall Sprinkler VK609 is cULus Listed as indicated in the Approval Chart for installation in accordance with the latest edition of NFPA 13 for extended coverage sidewall spray sprinklers:

- Sprinkler VK609 is cULus Listed for Light Hazard occupancies with smooth, flat, horizontal ceilings. Sprinkler VK609 is also listed for ceilings with slopes to 4/12 (18.4°), as a QREC “Specific Application Sprinkler”.
- For sprinkler VK609 in sloped ceiling applications, Sections 11.2.3.2.3 and 11.2.3.2.4 of the 2007 Edition of NFPA-13 do not apply regarding System Area of Operation. Sprinkler VK609 should be installed according to the areas of coverage, and flows and pressures listed in the Approval Chart.
- In sloped ceiling installations, sprinkler VK609 is listed for installation at the high-point intersection of the wall and the ceiling. In sloped ceiling installations, the spray must be directed down the slope. Spray may NOT be directed across the slope. Refer to Figure 6.
- Listed area of coverage for sloped ceilings corresponds to ceiling slope. (For sloped ceiling applications, actual floor coverage will be less than the listed area.)
- Refer to the Approval Chart for required deflector distance below the ceiling. Install with the leading edge of the deflector oriented parallel to the ceiling (see Figure 6).
- Minimum distance from end walls is 4 in. (102 mm).
- Maximum distance from the end wall shall be no more than one-half of the allowable distance between sprinklers. The distance shall be measured perpendicular to the wall.
- The sprinkler installation and obstruction rules contained in NFPA 13 for extended coverage sidewall spray sprinklers must be followed.

IMPORTANT: Always refer to Bulletin Form No. F_091699 - Care and Handling of Sprinklers. Also refer to Form No. F_080614 for general care, installation, and maintenance information. Viking sprinklers are to be installed in accordance with the latest edition of Viking technical data, the appropriate standards of NFPA, LPCB, APSAD, VdS or other similar organizations, and also with the provisions of governmental codes, ordinances, and standards, whenever applicable.
Figure 4: Sidewall Sprinkler Dimensions with the Model E-1 and E-2 Recessed Escutcheons

Wall Opening Size:
- Minimum: 2-5/16" (59 mm) minimum
- Maximum: 2-1/2" (64 mm) maximum

Installed with the
- Micromatic Model E-1 Recessed Escutcheon
- Threaded Model E-2 Recessed Escutcheon

Adjustable Adapter Ring

Depth: 1-1/16" (27 mm)

Adjustable Outer Cup

1/8" (3.2 mm)

Wall opening size with the Model G-1 Escutcheon:
- Minimum: 2-5/8" (66 mm) minimum
- Maximum: 3-3/4" (95 mm) maximum

1-1/16" (27 mm)

4" (102 mm)

Maximum Recess: 1/2" (13 mm)

** A 1/2" ratchet is required (not available from Viking)

Step 2: Carefully press the wrench onto the sprinkler wrench flats.

Figure 5: Sidewall Sprinkler Dimensions with the Model G-1 Escutcheon
NOTES:
1. In sloped ceiling installations, sprinkler is listed for installation at the high-point intersection of the wall and the ceiling. In sloped ceiling installations, the spray must be directed down the slope. Spray may NOT be directed across the slope.
2. Listed area of coverage for sloped ceilings corresponds to ceiling slope. (For sloped ceiling applications, actual floor coverage will be less than the listed area.)

Figure 6: Model G-1 Recessed Escutcheon Installed with an EC HSW Sprinkler below a sloped ceiling.
