Series 7001, 7002

AMES

UL/FM Fire Service Strainer

Sizes: 3" - 10" (80 - 250mm)

Features

- Epoxy coated fabricated steel strainer, flange x flange, groove x groove or groove x flange with single or dual cleanouts
- Large solids trap to minimize screen blockage
- 304 stainless steel strainer element

Pressure – Temperature

Maximum Working Pressure: 175psi (12.1 bar).

Water temperature up to 140°F (60°C)

Materials

Body & Cover: Fusion-bonded epoxy coated steel.

Screen: 304 stainless steel, .25 diameter

perforation

Clean-Out Plug: Brass or Bronze

Flanges: AWWA Class "D" Grooves: AWWA C606

Approvals

321

A WARNING

It is illegal to use this product in any plumbing system providing water for human consumption, such as drinking or dishwashing, in the United States. Before installing standard material product, consult your local water authority, building and plumbing codes.

Two Cleanouts

Series 7001, 7002 UL/FM Fire Service Strainer is used in non-potable applications in conjunction with a water spray system to protect the system against clogging that can be caused by particles fouling the small discharge opening of the sprinkler heads. Strainers for fire systems are designed to trap foreign material 1/4" diameter or larger. This type of strainer is usually installed upstream of most of the devices in the system

Specifications

large particles.

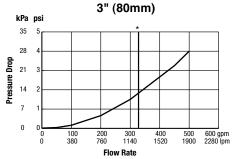

The strainer shall be designed to permit removal of the filter for replacement and repair without removing the body from the line. A flush outlet shall be provided with each strainer. The filter shall withstand 125psi (8.6 bar) when plugged. Friction loss shall not exceed 10psi (69 kPa) when tested with foreign materials (gravel) equal to $2^1/2^1$ (762mm) of filled pipe trapped in the strainer. Open screen area shall be at least 6 times greater than the nominal pipe size open area. Friction loss shall not exceed 3psi (21 kPa) at rated flow when tested with clean filter and clean water. The strainer shall be an Ames Company Series 7001, 7002.

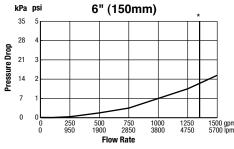

including the meters, backflow preventers (or detector check valves) and flow alarms, in order to protect these devices from damage caused by
