

Valves and Systems | Model G Praction Systems

Viking's Model G Praction Valves and Systems are unique in their simplicity and dependability. They are a preferred choice where it is important to control accidental water discharge due to inadvertent damage to the sprinkler piping. With a small, lightweight profile, these modular packages are completely pre-assembled and are ideal for protecting damage-sensitive areas such as computer rooms, libraries, museums, and freezers.

- Available in single interlock with electric release, double interlock with electric/pneumatic release, double interlock with electric/pneumatic release configurations as well as Viking's SureFire® fail safe preaction system.
- Each system is factory tested and pre-assembled to the valve (water supply control valve and switched included).
- The Model G Valve includes an internal check valve, eliminating the need for a separate riser check valve.
- In addition to complete, factory-installed trim components, a 12 inch section of piping is included to facilitate installation and servicing.
- Smaller and lighter weight for ease of installation.
- cULus and FM approved.

Complete, pre-assembled preaction valve and trim includes the following

- Model G Valve
- Model G Trim Package
- Water Supply Control Valve
- Air Pressure Supervisory Switch (PS40-2A)
- Alarm Pressure Switch (PS10-1A)
- Air and Water Pressure Gauges
- 12 inch section of Galvanized Schedule 10 Pipe with Coupling (G-2000P has a 10 inch section of pipe)

See Viking technical datasheets for complete product specifications.

Part Numbers	2 inch G-2000P	3 inch G-3000P	4 inch G-4000P	6 inch G-6000P
Single Interlock	16187-1	16190-1	15651-1	17049-1
Double Interlock	16188-1	16191-1	15653-1	17050-1
SureFire® fail safe	16189-1	16192-1	15648-1	17051-1
