To Whom It May Concern

Re: Use of Recycled Materials

The bronze valves that United Brass Works, Inc. manufactures for fire protection applications are made almost exclusively from post-consumer or post-industrial recycled material. The percentage of recycled material in these products, by weight, runs between 90% and 98% depending on the valve. All scrap generated in our plant as part of the manufacturing process is also recycled, often times going back to the same supplier that furnished the original material so that it can be turned back into ingot or bar stock.

Questions on specific items should be referred to Untied Brass Works, Inc. at 800/334-3035 ext .236.

Thank you,

Jim Sattler
Sales Manager
