

Valves and Devices | VXD Deluge and Preaction Valves

Viking's new VXD deluge and preaction valves offers a more lightweight solution that makes for easier installation, particularly in tight spaces, while offering the same robust quality and durability that Viking customers are used to. The product joins Viking's industry-leading line of valve systems as a smaller option for system risers. Additional benefits include:

- The valves are available to order in multiple sizes of GxG and FxF models.
- VXD valves are available in sizes ranging from 1-1/2" - 10".
- The VXD line of valves still feature a self cleaning seat and clapper.
- The VXD deluge valve is offered in electric, pneumatic and hydraulic release, while the preaction VXD valve is offered in electric and electric/pneumatic release.
- The line is available pre-trimmed or with loose trim.
- The preaction model is offered with a check valve in place.
