Ref: LEED – Leadership in Energy and Environmental Design

To whom it may concern:

This letter is a follow up to your inquiry concerning the amount of recycled material in Wheatland's pipe and conduit products.

The pipe and conduit products manufactured by Wheatland Tube Company are produced from approximately 25% to 85% recycled steel. The amount can vary depending on the steel vendor. If you must use one number and not a range, use 66%. Of the 66% recycled steel approximately 30% is pre-consumer (or post-industrial) and 70 % is post-consumer depending on fluctuating scrap prices. The American Iron and Steel Institute (AISI) website states: "Steel's recycling rate of 66% is far higher than that of any other material capturing twice as much tonnage as all other materials combined."

Wheatland has five manufacturing facilities in the following locations: Wheatland, Pennsylvania; Warren, Ohio; Cambridge, Ohio, Chicago, Illinois and Long Beach, CA.

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

Michael S. Ryan
Technical Services Manager
