

Storage | Model EG-100 ESFR Sprinkler Guards

Viking's new ESFR sprinkler guards are FM Approved to keep ESFR sprinklers safe from damage in areas with high human mechanical activity. The new Model EG-100 guards ensure that the sprinklers are protected in various applications, such as rack storage, where damage to low elevation sprinklers is likely to occur. Specifically designed with retrofit installation in mind, the new ESFR sprinkler guards feature a hinged clamshell design with a hardwire cage that completely encases the sprinkler.

- FM Approved for use with VK506 (K22), VK510 (K25), and VK514 (K28).
- With a simple hinged clamshell design and a single Torx set screw, the guards allow for quick and efficient installation on Viking's 1" NPT ESFR sprinklers.
- The ESFR guards are available in a 3-5/8" (95 mm) length and diameter.
- Offered in both painted red and chrome.

Listings/Approvals: FM Approved

Finish: Painted Red, Chrome

Item Price Group: V206

Occupancy/Hazard: Storage/Non-Storage

Technical Datasheet: F_061620

Part Number: 23334

Dimensions: 3-5/8" length
3-5/8" diameter

Size: 1" NPT

MKT-0008

General reference only. Prior to the design, layout, and/or installation of any sprinkler system, please refer to Viking's technical documentation and consult with the AHJ.
